Does Ottawa have a battery energy storage plan?

In 2025, the City of Ottawa established official plan and zoning provisions for battery energy storage uses in accordance with new Official Plan policy. BESS is an emerging technology using batteries and associated equipment to store excess energy from the electrical grid, which can then discharge energy in periods of high demand.

Is Ottawa looking at regulatory changes around battery energy storage facilities?

Ottawa is looking at regulatory changes around these types of facilities. (Ross D. Franklin/The Associated Press) UPDATED: City councillors unanimously approved the new rules for battery energy storage facilities at their meeting on Feb. 12, 2025.

Can a battery facility be built in Ottawa?

According to the new rules, companies looking to build a battery facility will have to show Ottawa Fire Services (OFS) that effective fire and safety risk management has been incorporated into the design. Companies will be required to install fire prevention and suppression systems, and provide OFS with site-specific training.

On May 9, 2024, the IESO announced that ten proposed BESS projects were selected, totaling 1,784 megawatts (MW) of energy storage, including two to be located in rural ...

Although energy storage comes in different shapes and sizes, the lithium-ion Battery Energy Storage System ("BESS") is the fastest emerging technology in North America and is planned ...

In West Ottawa, a proposed energy project will address Ontario's growing need for electricity and promises to stabilize the province's energy grid, preventing potential blackouts.

These systems can include renewable energy sources such as wind turbines in neighbourhoods, solar panels on homes and businesses, and battery ...

On May 9, 2024, the IESO announced that ten proposed BESS projects were selected, totaling 1,784 megawatts (MW) of energy ...

Workers check battery storage pods at a lithium-ion battery storage energy facility in Arizona last year.
