What is a prefabricated container house?

A prefabricated container house is a sustainable building solution for expanding site camps, designed to be energy-efficient and flexible working spaces. The 20ft (6m) container house is the base model self-contained unit.

What is a flat pack container house?

A flat pack container house is a type of container house that transports its materials to the site in a packaged form. This method reduces transportation costs and is more cost-effective than traditional sea container houses, with costs being half or even less.

What is a shipping container home?

A shipping container home is a house built using recycled (or new) shipping containers. These containers are very sturdy and weather-resistant, as they are built to hold heavy cargo in rough sea conditions. They are typically made of steel and are rectangular in shape.

How long does it take to build a container house?

We can fabricate a lot of 20ft (6m) container houses within 10 days and transport them to your construction site. Each unit is a self-contained base model with a built-in kitchen, laundry, bathroom, and custom fold-down bed/lounge. All fittings meet your needs.
