Can Paraguay diversify its energy matrix and reduce its reliance on hydrocarbons?

The country's success in diversifying its energy matrix and reducing its reliance on hydrocarbons could have far-reaching implications, not just for the region, but for the global energy landscape. The future of energy in Paraguay is bright--and it is powered by the sun, the wind, and the innovative spirit of its people.

Can Paraguay use natural gas as a transitional energy source?

In addition to its focus on renewables, Paraguay is also looking to natural gas as a transitional energy source. The country's new energy policy includes a project to integrate natural gas into its energy matrix. This would provide a reliable alternative to hydrocarbons while renewable technologies continue to scale.

What is Paraguay's energy policy?

The policy is expected to enhance Paraguay's energy resilience, foster innovation, and contribute to global sustainability goals. Paraguay has long been known for its reliance on renewable energy. Nearly 100% of its electricity is generated from hydropower, mainly through the Itaipu and Yacyretá dams.

Is hydrogen the future in Paraguay?

"Hydrogen is the future," Bejarano stated, highlighting the country's ambitions to develop hydrogen-based energy solutions over the next few decades. This focus on innovation aligns with global trends and sets Paraguay on a path to becoming a key player in the renewable energy market.

A joint venture (JV) formed by investors PASH Global and ERIH Holdings reportedly plans to develop utility-scale solar power ...

As South America races toward its 2030 renewable energy targets, Paraguay's Cerro Port Energy Storage Export initiative emerges as a game-changer. With 98% of its electricity already hydro ...

Paraguay's energy storage projects demonstrate how CCB technology can transform renewable energy systems. By addressing storage challenges, these initiatives position Paraguay as a ...

This paper analyzes technically and economically an autonomous sodium hypochlorite plant using a renewable energy source and a hydrogen storage system in the Western Region of Paragua...

Ground Paraguay's infrastructure transition on four pillars: 1) expansion of renewable energy generation
