Designing, developing and manufacturing customised lithium-ion battery packs using a full range of battery chemistries, Alexander Battery Technologies delivers incredibly reliable ...

When batteries are to be operated at temperatures above this range, special high or low-temperature lithium-ion batteries are required to avoid damage, fire, or even explosion.

Next-generation battery management systems maintain optimal operating conditions with 45% less energy consumption, extending battery lifespan to 20+ years. Standardized plug-and-play ...

Insulated containers: safe and secure access with active thermal management to optimize battery life and offer a work-friendly operating environment. Proven Battery Management System ...

Custom ultra-low temperature batteries, with up to -50° discharge and -20° charging, high discharge efficiency, widely used in fields that require low-temperature, such as subsea, ...

These low temperature lithium ion batteries support to charge below at -35°C with self-heating and waterproof IP68 functions. If you're considering both safety and low cost, we recommend ...
