Why is 5G so slow?

Sometimes, the problem isn't with your phone or your location but with your carrier's network. If your carrier's infrastructure is not properly optimized for 5G, speeds can be slower than expected. Carrier-specific issues, such as software problems or service outages, can also contribute to poor 5G performance. 5. Software or Firmware Problems

Is a 5G spectrum auction a success in Paraguay?

The U.S. Embassy in Paraguay has welcomed the country's recent 5G spectrum auction, calling it a success despite limited participation and criticism over its restrictive terms. The U.S. mission praised the process for aligning with Washington's stance on banning Chinese technology from critical telecom infrastructure.

How does traffic affect 5G speeds?

Being too far away from a 5G tower or trying to use a 5G connection in an area surrounded by tall buildings or trees can reduce effectiveness and affect speeds. And since 5G towers aren't quite as prevalent as, say, LTE towers, traffic can cause a metaphorical bottleneck that gums up the works and slows speeds down for everyone.

When will 5G start in Argentina?

Operators have six months to begin infrastructure deployment, with commercial 5G service expected to launch between March and April 2026. Nubicom, which currently provides fixed internet services in Argentina's Salta province but has no mobile infrastructure in either Argentina or Paraguay, will have to build a mobile network from scratch.

The encouraging sign is that Paraguay's growth rates in connectivity are high - it's closing the distance gradually. If initiatives like the rural connectivity programs and Starlink ...

Paraguay's National Telecommunications Commission (CONATEL) has made key changes to the National Frequency Allocation Plan (PNAF). This has affected several ...
