Croatia's solar market continues to grow steadily, led by the self-supply and commercial and industrial (C& I) segments, while regulatory barriers stall utility-scale ...

Its ambitious goal for Croatia, to source all electricity from renewables by 2030, is based on a shift to solar and wind energy, as well as investments in the transmission network. ...

Croatia is expected to surpass 1 GW of solar power by 2025, driven by a significant increase in installations and supportive policies. The expansion is part of the country's broader ...

Renewable sources supply around 30% of Croatia's energy needs, but only two percent is solar energy. The potential for solar energy is estimated at 6.8GW (majority in utility-scale or ground ...

Croatia crossed the 1 GW milestone in May 2025 and, if current trends persist, could reach 1,290 MW by December 2025. The self-supply sector, particularly households and ...
