The aim of the project was to optimise the geographical and temporal distribution of surplus energy from renewable energy systems (RE systems) using bi-directional electric vehicles ...

Abstract--This paper proposes a novel control algorithm to use bidirectional charging of electric vehicles (EVs) in the framework of vehicle-to-grid (V2G) technology for optimal energy ...

Containerized mobile foldable solar panels are an innovative solar power generation solution that combines the mobility of containers ...

LZY mobile solar systems integrate foldable, high-efficiency panels into standard shipping containers to generate electricity through rapid deployment generating 20-200 kWp solar ...

Design and development of a bidirectional high gain converter (BHGC) that can operate efficiently in both Grid-to-Vehicle (G2 V) and Vehicle-to-Grid (V2 G) modes, utilizing ...

This paper presents bidirectional power flow between the power grid and EVs through on-board charging to address this issue. The ...
