Learn about Anza's platforms that provide accurate solar module and energy storage supplier pricing, tariff, domestic content, counterparty, and technical data from across the market.

Polysilicon prices dropped by almost 50% in China (falling to around ~US\$5/kg) and 20% globally, which, in turn, has helped lower solar module prices by 37 to 46% yoy, underpinning a global ...

Industry data reveals current BESS project costs range between \$280,000 to \$480,000 per MWh installed, depending on configuration and ancillary components.

A late 2025 market report shows US solar module prices stabilizing just over \$0.28/W, while battery energy storage system (BESS) prices see significant quarterly declines ...

On average, installation costs can account for 10-20% of the total expense. Unlike traditional generators, BESS generally requires less maintenance, but it's not maintenance ...

These are the key conclusions to be drawn from Anza's latest report into the US solar and battery energy storage system (BESS) sector, published this week.
