Will France build Iraq's largest solar power plant?

France's TotalEnergies has started constructing Iraq's largest solar power plant as part of a \$27 billion energy deal it signed in 2023.

What is the largest solar power plant in Iraq?

The plant, based in the southern oil hub of Basra, has a production capacity of 1,000 megawatt (MW) and includes installing two million solar panels, the official news agency said, citing an Electricity Ministry statement. "This is the largest solar power plant in Iraq.

What will Iraq do with totalenergies in 2023?

Iraq's agreement with TotalEnergies in mid-2023 includes the development of a number of oil and gas fields in Southern areas, the construction of a solar power plant and a seawater desalination station with a capacity of five million barrels per day.

When will solar power projects be completed?

The initial phases of solar power and associated gas projects are targeted to be completed in phases between 2025 and 2027.

The agreement covers collaboration on clean energy solutions, with a focus on solar power, and on providing technology and infrastructure services for the ...

It also stipulates the implementation of 75 MW out of the total contracted capacity of 525 MW within a maximum period of 12 months from the signing of the power purchase ...

It also stipulates the implementation of 75 MW out of the total contracted capacity of 525 MW within a maximum period of 12 months ...

Al-Sawad emphasized the importance of increasing the use of alternative energy sources in Iraq, particularly in electricity generation. ...

The solar panels are expected to be installed as part of the \$820 million project being carried out by France-based TotalEnergies to ...
