How do I calculate equipment cost for a wastewater treatment plant?

Simply enter your wastewater treatment plant's daily flow (GPD) to get an estimated equipment cost. For a ballpark constructed plant cost, multiply the equipment cost by 1.5 to 2 times. This calculation offers a straightforward way to plan your budget, but understanding project-specific factors is critical for accurate planning.

What types of wastewater treatment systems does S&L offer?

S&L offers a complete range of package wastewater treatment plants and systems designed for industry, municipalities and private development. Our systems range from innovative membrane bioreactors, fixed bed biological reactors and complete extended aeration plants.

What is a containerised portable sewage treatment plant?

A containerised portable sewage treatment plant gives clients the option to relocate it onsite or easily transport it to new sites as necessary. In addition to that, the systems are modular so that they can work together in a variety of combinations effectively dealing with variable wastewater volumes to achieve any effluent quality.

What is a Biocell water containerised wastewater treatment plant?

Biocell Water containerised wastewater treatment plants offer a fast and effective above ground portable wastewater treatment system solution for any site, without the need for any existing infrastructure. Containerized mobile treatment systems are ready to use immediately on delivery and cater from 60 persons to 20,000 persons capacity.
