Why do solar modules cost so much?

However, as the primary cost component of photovoltaic modules, the price of solar cells plays a decisive role in module pricing. Due to the oversupply of polysilicon in earlier periods, prices have been under sustained pressure since 2023, even falling below cost levels in the first half of 2024.

How much does a solar module cost in 2025?

Specifically, in August 2025, the Price Index showed: about EUR0.055/Wp for low-cost photovoltaic modules, unchanged from July prices. "Manufacturers are moving quickly to end the devastating price war. The Chinese government is gradually phasing out tax incentives and subsidized solar module exports.

How much does a photovoltaic module cost?

Mainstream Modules: Average price of EUR0.11/Wp, stable compared to September but 21.4% lower than January 2024. Low-Cost Modules: Average price of EUR0.065/Wp, a 7.1% decrease from September and 27.8% from January 2024. These trends are exerting mounting pressure on the photovoltaic sector.

How big is the solar manufacturing industry?

To meet this growing demand, the solar manufacturing industry has experienced remarkable growth in the last few years, with global module manufacturing capacity increasing from only 326 gigawatts in 2020 to more than 1.3 terawatts in 2023.

To meet this growing demand, the solar manufacturing industry has experienced remarkable growth in the last few years, with ...

Prices have begun to fall after a brief stabilization phase - declining by around 5% to 8% across all technology classes in recent weeks. This drop returns prices to levels seen at ...

In August, high-efficiency modules dropped to EUR0.12 per watt, marking an all-time low for the sector. Prices for photovoltaic modules in 2024 continue to fall. According to the ...

In capacity updates, several module plants have halted production or reduced operating rates in January due to the festive ...

Solar module prices projects to jump 9% in Q4 2025 as China reduces VAT rebates. Learn procurement strategies, technology alternatives (HPBC/ABC), and cost-saving ...

In the third quarter (Q3) of 2024, module prices rose 1% but stayed near record lows, around \$0.10/ Watt direct current (W dc), as ...
