---

It has two sets of windings: a three-phase alternating current (AC) winding and a direct current (DC) winding. When the public power grid is available, the AC winding is ...

Curtis Power Solutions offers dynamic uninterrupted power supply systems from 120 kW to 2160 kw for a wide variety of applications. Dynamic UPS systems (DUPS), sometimes referred to as ...

When mains electricity supply fails, stored energy in the flywheel is released to drive the electrical generator, which continues to supply power without interruption.

Curtis Power Solutions offers dynamic uninterrupted power supply systems from 120 kW to 2160 kw for a wide variety of applications. Dynamic UPS ...

Rotary UPS systems offer exceptional power conditioning capabilities. In addition to providing backup power, they filter out voltage dips, harmonics, and other distortions.

It transfers the kinetic energy stored in the flywheel to the generator, so guaranteeing an uninterrupted supply of power. The flywheel is available ...
