Is Saudi Arabia developing a large-scale battery storage project?

The project is among several large-scale battery storage initiatives being developed in Saudi Arabia. In an ongoing procurement, the Saudi Power Procurement Company (SPPC) is tendering four 500 MW / 2,000 MWh BESS projects.

Why is energy storage important in Saudi Arabia?

Energy storage is a vital component of this transition, providing grid flexibility and enabling the integration of intermittent power sources such as solar and wind. The project is among several large-scale battery storage initiatives being developed in Saudi Arabia.

Does Saudi Arabia have a solar-research station?

In 2011, The United States and Saudi Arabia jointly set up a solar-research station in Al-Uyaynah village. The village, located about 30 miles northwest of Riyadh, had no electric supply at the time. The station is operated by the King Abdulaziz City for Science and Technology.

Who are Saudi power procurement Company (SPPC) bidders?

In an ongoing procurement, the Saudi Power Procurement Company (SPPC) is tendering four 500 MW / 2,000 MWh BESS projects. The list of prequalified 33 bidders was released earlier in January, revealing Masdar, ACWA Power, EDF, and TotalEnergies as competitors for 15-year storage services agreements.

The different types of lithium battery charging cabinets available in the market include wall-mounted cabinets, floor-standing cabinets, and portable charging stations.

The joint venture also plans to establish BESS (Battery Energy Storage System) manufacturing facilities in Saudi Arabia, targeting an annual production capacity of 5GWh.
