In contrast to stationary storage and generation which must stay at a selected site, bidirectional EVs employed as mobile storage can be mobilized to a site prior to planned outages or arrive ...

In contrast to stationary storage and generation which must stay at a selected site, bidirectional EVs employed as mobile storage can be ...

Bidirectional charging, such as Vehicle-to-Grid, is increasingly seen as a way to integrate the growing number of battery electric vehicles into the energy system. The electrical ...

Given the right energy management solutions, bidirectional charging, or V2X, could add significant storage capacity for these systems. In addition, pairing a V2X system with ...

Chicago-area utility ComEd is partnering with Nuvve to explore the potential of bidirectional charging, using electric school buses to support the grid as part of a new pilot ...

The pilot will evaluate ways to deploy energy stored in the batteries of electric school buses to enhance grid stability and reduce energy costs. Three ...
