---

This edition of news in brief focuses on second life battery storage, a nuclear reactor-BESS partnership for data centres and flow batteries: energy storage technologies that ...

As the world shifts towards a more sustainable energy future, the integration of second life battery energy storage systems presents a pivotal opportunity. These systems leverage used ...

East of San Antonio in Bexar County, 500 electric vehicle batteries at the end of their automotive lives will soon be repurposed to provide energy storage for Texas' electric ...

B2U's EPS cabinet enables plug and play reuse of EV battery packs without incurring repurposing costs. Cabinets are designed to electrically and mechanically integrate 2nd life EV battery ...

Second-life battery packs for stationary energy storage in the grid are a relatively new concept that is both economically affordable and profitable, promoting the circular ...

CycleWatt reuses retired EV batteries directly -- without any dismantling -- to build second-life Battery Energy Storage Systems (BESS). Our technology extends the life of these batteries by ...
