Peak Energy designs and deploys next-gen sodium-ion energy storage that is safer, lower-cost, and more reliable. Our systems remove legacy failure points and enable rapid grid growth to ...

US-based battery developer Alsym Energy has officially announced its new Na-Series line, a sodium-ion battery aimed at the stationary energy storage market. The company ...

Developed for safety and versatility, Alsym's Na-Series batteries can be deployed in dense urban environments, including rooftops, basements, and critical infrastructure.

Much of the attraction to sodium (Na) batteries as candidates for large-scale energy storage stems from the fact that as the sixth most abundant element in the Earth's crust and the fourth ...

Launching the US's first grid-scale sodium-ion battery comes less than two years after Peak Energy came out of stealth mode and just a year after it closed a \$55 million Series ...

Launching the US's first grid-scale sodium-ion battery comes less than two years after Peak Energy came out of stealth mode and just ...
