In hot conditions or for building with high internal loads, solar control glass is used to minimize solar heat gain. It allows sunlight to pass through a window while radiating and reflecting away ...

This advanced technology helps manage solar heat gain and color rendition throughout the day, creating a comfortable and sustainable indoor environment. It can also be combined with ...

Use the Glass Visualizer to get an introductory understanding of how glass will appear in use. Use the Glass Analytics tools to explore even more options for color and performance.

Pilkington Solar-E(TM) and Pilkington Solar-E(TM) Plus are a range of solar control clear or body-tinted coated glass with medium light transmittance, ...

Pilkington Solar-E(TM) and Pilkington Solar-E(TM) Plus are a range of solar control clear or body-tinted coated glass with medium light transmittance, low light reflectance, and low emissivity.

In hot conditions or for building with high internal loads, solar control glass is used to minimize solar heat gain. It allows sunlight to pass through a ...
