Are hybrid PPAs a viable solution to co-location?

PPAs |The co-location of renewable generation and energy storage demands new contractual arrangements to make such projects commercially viable. Jack Rankin, Miguel Valderrama and Brian Knowles of Pexapark explore how hybrid PPAs are becoming a favoured solution for structuring deals that capture the full value of both assets

Are hybrid PPAs a 'co-located' asset?

Jack Rankin, Miguel Valderrama and Brian Knowles of Pexapark explore how hybrid PPAs are becoming a favoured solution for structuring deals that capture the full value of both assets In the world of power infrastructure, we may broadly define "co-located" assets as those that share a single connection to the grid.

Will hybrid PPA contracting continue to grow?

In conclusion, we expect that gradually more and more markets will continue to devise mechanisms to stimulate flexibility additions, as this is indispensable in grids with a growing share of intermittent renewables; this in turn will favour the deployment of storage co-location, leading also to a growth in hybrid PPA contracting.

This article establishes a full life cycle cost and benefit model for independent energy storage power stations based on relevant policies, current status of the power system, and trading ...

Selecting modular solar power station containers for microgrid and hybrid energy systems requires alignment with load profiles, expansion plans, and environmental conditions.

An O& M contract is an agreement between the parties involved in the construction and operation of a renewable energy plant (such as a solar or wind power plant) to regulate ...

Highjoule HJ-SG-R01 Communication Container Station is used for outdoor large-scale base station sites. Easy to Transport The cabinet is made of lightweight aluminum alloy, allowing for ...

Notoriously, in June of 2023 the UK's first unsubsidised and bankable solar-plus-storage of-take agreement was signed.
