---

The ability to store and dispatch large amounts of energy allows for greater penetration of renewable energy sources into the grid, particularly solar power from the Atacama Desert.

Integrating solar energy and storage technologies is crucial for addressing the intermittency and grid stability in Chile. Key projects ...

Solar power combined with battery energy storage is at the forefront of Chile's recent generation growth.

Spanish renewables developer Zelestra has signed a long-term power purchase agreement (PPA) with gas provider Abastible for a solar-plus-storage plant in Chile.

Chile has reached fresh milestones in its energy transition amid a rapid build-out of solar and battery storage infrastructure. The ...

Spanish renewables developer Zelestra has signed a long-term power purchase agreement (PPA) with gas provider Abastible for a ...
