The CT monitors power flow at the grid connection point of the system. If it detects that power flow is about to exceed the backflow power limit, the inverter will automatically ...

Step-by-step guide to connect a CT to your solar inverter. Benefits of using a CT in managing energy flows, net metering, Pro tips for ensuring accurate installation and optimal performance.

Installation: CT sensors are placed around the wires that carry electrical current from solar panels to inverters or from the inverter ...

The Meter/CT Self-Check function can identify whether there has problems with the Meter and CT installation through the feedback of the power changes. After the installation is completed, you ...

CSI inverters integrate the export limitation function, to use this function, please read this installation guide to install the CT sensor and set the inverter.

Installation: CT sensors are placed around the wires that carry electrical current from solar panels to inverters or from the inverter to the grid. These sensors do not disrupt the ...
