There continues to be a major gap when it comes to long-duration energy storage, also known as LDES. LDES is defined by the U.S. Department of Energy (DOE) as any ...

For solar-plus-storage--the pairing of solar photovoltaic (PV) and energy storage technologies--NLR researchers study and quantify ...

In an innovative step forward, RayGen of Australia has combined concentrated solar with utilization of waste heat (through the ...

The system can decrease on-site construction intensity, increase deployment efficiency by 18%, and reduce land use by 23% by optimising hoisting and cabling. The ...

Variable renewable energy (VRE) sources, like solar and wind, operate roughly 40% of the time. To maintain 100% uptime, data centers that use VRE sources must either ...

In an innovative step forward, RayGen of Australia has combined concentrated solar with utilization of waste heat (through the Rankine cycle) to create cost-effective long ...
