How can Solomon Islands achieve low emissions development?

Substantial international and domestic finance and investment will be needed to meet Solomon Islands ambitions for low emissions development. In 2022, the Solomon Islands Government developed a climate finance roadmap²² and established a National Climate Finance Steering Committee and secretariat²³.

How did Solomon Islands achieve a net zero emissions vision?

The vision was developed through national consultations across government, private sector, community sector, and development sector between 2021 and 2023. Solomon Islands aim to maintain net zero emissions across all sectors by 2050 with equitable economic growth and resilience.

What does the Solomon Islands government do to increase electricity access?

The Solomon Islands Government has several objectives, policies, programmes, and projects that aim to increase electricity access. The Energy Division of the Ministry of Mines, Energy, and Rural Electrification administers the Electricity Act 1969 and is responsible for the National Energy Policy 2019.

Can Solomon Islands sell carbon credits?

Solomon Islands is a potential seller of carbon credits under Article 6 or other type of carbon trading. The large forest area can remove substantial volumes of carbon dioxide, well beyond the emissions that are generated from human activities.

The study specified the contribution of each section to different performances and provided a new design method for the application of VPV curtain walls towards energy-efficient ...

The research findings of this paper provide a theoretical reference for the future development and application of photovoltaic ...

Both curtain walls and spandrels from Onyx Solar elevate your building's sustainability and aesthetic appeal, providing customizable options and cutting-edge design. Explore how our ...

The programme will enhance school and health infrastructure to withstand climate shocks, operate with low-carbon solar panels, and access quality water, sanitation and ...
