Welcome to the Solomon Islands, where the Oslo Solomon Islands Energy Storage Project aims to swap smoke-belching generators for lithium-ion batteries and solar panels.

The project comprises of the following four components: (i) Sub-transmission and distribution network reconstruction, reinforcement, and operations efficiency in the major load centers of ...

Next-generation battery management systems maintain optimal operating conditions with 45% less energy consumption, extending battery lifespan to 20+ years. Standardized plug-and-play ...

The Solomon Islands energy storage project demonstrates how cutting-edge technology can meet real-world energy needs while supporting sustainable development goals.

What is a solar hybrid project in Solomon Islands? The project will finance new solar farms in Guadalcanal and Malaita province, along with a utility-scale grid-connected energy storage

A Higher Wire system includes solar panels, a lithium iron phosphate battery, an inverter--all housed within a durable, weather ...
