Does South Sudan have a large-scale solar power project?

South Sudan has taken a significant step toward renewable energy with the launch of its first large-scale solar power project. The Ezra Group, a prominent business conglomerate, has successfully developed and financed a 20-megawatt (MW) solar power plant, complemented by a 14-megawatt-hour (MWh) Battery Energy Storage System (BESS).

Why should South Sudan invest in solar power & battery storage?

This project marks a significant achievement for South Sudan, reinforcing its commitment to renewable energy and environmental responsibility. By investing in solar power and battery storage technology, the country is making a decisive move toward energy independence, economic growth, and a sustainable future for its people.

What projects are underway in South Sudan?

Plans are already underway for other projects like the government-owned Nisitu Solar Plant which will complement existing structures and enhance overall grid reliability. Ezra Construction & Development Group is dedicated to expanding renewable energy solutions across South Sudan.

Developed and financed by Ezra Construction & Development Group Ltd., the 20-megawatt (MW) solar power plant and accompanying 14-megawatt-hour (MWh) Battery ...
