Spain's solar PV capacity reached 6 GW in 2024, making it the country's top power source with a 25.1% share, surpassing wind at 24.9%. Renewable generation grew ...

According to data from Red Eléctrica, solar photovoltaic (PV), with a total capacity of 32,043 MW, has surpassed wind power (32,007 ...

Spain's significant potential comes from having plenty of sunlight, large lithium deposits, and ideal conditions for wind and water power -- factors that helped Spain achieve ...

Spain's significant potential comes from having plenty of sunlight, large lithium deposits, and ideal conditions for wind and water ...

Spain is one of the first countries to deploy large-scale solar photovoltaics, and is the world leader in concentrated solar power (CSP) production. Spain is also one of the European countries with the most hours of sunshine. In 2022, the cumulative total solar power installed was 19.5 GW, of which 17.2 GW were solar PV installations and 2.3 GW were concentrated solar power. In the same year...

Discover how Spain is accelerating renewable energy with large-scale solar, wind, and hydrogen projects, backed by strong policy, investment, and innovation.
