How will a battery system help Saint John energy?

The battery system may also help Saint John Energy provide power to customers during power outages due to storm events. The project will support a greener grid in New Brunswick and reduce greenhouse gas emissions, while supporting an equitable transition to an electrified economy.

How does Saint John energy plan a project?

One approach that has worked well for Saint John Energy is scenario planning with a focus on agility in people, processes and technology. We try to envision future scenarios and study contrasting realities. This allows us to identify which potential projects to prioritize in each scenario.

What makes Saint John energy different?

Tell us a little bit about Saint John Energy. What makes the utility different? Saint John Energy is a municipal electricity distribution utility that has been keeping customers' power on and their rates stable since it was founded in 1922.

Who is Saint John energy?

Saint John Energy is a municipal electricity distribution utility that has been keeping customers' power on and their rates stable since it was founded in 1922. We are owned by the City of Saint John and receive electricity for distribution as a wholesale energy provider from NB Power.
