What happened to Syria's energy infrastructure?

A Heavy Legacy of Destruction The war has left Syria's energy infrastructure in ruins. Damaged oil and gas fields, power plants, and transmission lines have exacerbated a severe electricity crisis. Losses to the electricity sector alone amount to an estimated \$40 billion, according to former regime officials.

How will Syria's energy projects impact the economy?

Upon completion, the projects are expected to supply over 50% of Syria's national electricity needs, representing a transformative leap toward energy security, economic revival, and infrastructure resilience. This initiative goes beyond grid stability, aiming to deliver widespread social and economic impact through:

Will Syria's energy sector be rehabilitated?

Rehabilitating Syria's energy sector is central to its economic revival. Restored power will benefit households, where electricity access in Damascus is currently limited to three hours a day, and reinvigorate factories and industrial facilities that have been paralyzed for years.

Will Hunt Energy & Argent LNG develop a masterplan for Syria?

DAMASCUS, July 18 (Reuters) - U.S.-based firms Baker Hughes (BKR.O), Hunt Energy and Argent LNG will develop a masterplan for Syria's oil, gas and power sector, Argent LNG CEO Jonathan Bass said on Friday, in a partnership aimed at rebuilding energy infrastructure shattered by 14 years of civil war.
