Solar-powered desalination plants integrating 20MW PV arrays with 80MWh storage--a potential solution to both energy and water crises. First pilot launches in Latakia this September.

In a landmark move for its energy sector, Syria has partnered with the US-based firm 20 Solar Energy LLC to develop an ambitious 200 MW of solar projects across the country.

It proposes the construction of three 100 MW PV solar plants strategically located near Aleppo, Damascus, and Homs, with future expansion plans to include Deir ez-Zur and ...

In the heart of the Middle East, Syria is quietly making waves with its groundbreaking energy storage project - a \$120 million initiative aiming to stabilize the national grid while integrating ...

The agreement provides a framework for conducting detailed technical and commercial studies on existing power plants and the national grid, as well as evaluating and ...

This Syrian solar energy storage case study shows how combining advanced Axpert inverters with M90 PRO lithium batteries provides a practical, reliable, and scalable ...
