The centre operates in Tallinn's first power plant and aims to inspire children to learn about natural and physical sciences. The centre features over a hundred hands-on ...

Inspired by Pärnu's initiative, Tartu and Tallinn followed suit, establishing their own public power plants in 1913. These key developments marked the beginning of Estonia's electrification, ...

The Tallinn Power Plant (Estonian: Tallinna elektrijaam) is a former power plant located in Tallinn, Estonia. Construction of the power plant was initiated by Volta company and it was decided by ...

The plant was located next to the Tallinn Gas Factory at the location of the former Stuart fortress. The plant was designed by Volta and the architect was Hans Schmidt.

Power was last generated at the station on 2 February 1979, after which it produced and distributed heat. It was officially renamed the Tallinn Heat Network in 1982. Its boilers ...
