In 1882 Thomas Edison constructed Pearl Street Station, the first purpose-built power station. Built in New York City, this station provided the first electric light to Wall Street ...

Pearl Street Station is described as the first purpose-built power station by National Grid. It is recognized as the United States' first central power plant by the Institute For Energy Research.

"America's electric age was born at 357 Pearl Street in Lower Manhattan when Thomas Edison began operating the city's first central power station.

The inauguration of the Pearl Street Generating Station marked not just the birth of a power facility but the expansion of electrical power services across Lower Manhattan.

Pearl Street Station was Thomas Edison's first commercial power plant in the United States. It was located at 255-257 Pearl Street in the Financial District of Manhattan in New York City, ...
