-----  
What is an upright folding container?

An upright folding container is a type of container with hinged long sides in the middle and hinged short sides at the base. In its folded and upright state, the upper frame remains rigid, providing the necessary stability. This type of container is commonly used in the retail sector.

What is a collapsible shipping container?

Shippers are demanding improved efficiencies and sustainability throughout their supply chains. COLLAPSECON is the collapsible shipping container pioneering the future of global trade. Its practical and rigid design saves on space, cost and handling, and helps to significantly reduce industry emissions.

Should a container be collapsible vertically?

Collapsing vertically has its benefits, but strength is not one of them. Given the requirement to position containers anywhere on a vessel, the industry must be confident that a collapsible container can sustain the weight of fully laden boxes both at sea and in the port.

How long does it take a container to collapse?

Many collapsible containers require 3-4 people and a crane to operate, often taking 15-20 minutes per unit to collapse, usually by lifting or pushing the container. This causes increased wear and tear, slows operations and increases safety risks. By comparison, COLLAPSECON has true stand-back functionality.

Vestil ROL-1834-3 rollable container from HoF Equipment Company offers 990 lb capacity, durable steel build, and fold-and-nest design for efficient use.

The fully automated, horizontally folding container that combines up to 4 empty containers into one.
