Does Ukraine have a solar power plant?

Ukraine's annual solar energy volume is higher than that of Germany, one of the industry leaders. From 2018 to 2020, solar energy capacity increased nearly fivefold. As of 2024, solar power plants account for about 75% of "green" energy production in Ukraine (excluding large hydropower plants).

How much solar energy did Ukraine invest in 2023?

In 2023, Ukrainian businesses invested around USD 150 mln in solar energy. The plan is to reduce greenhouse gas emissions to 35% of the 1990 level and achieve carbon neutrality by 2060 by replacing coal energy with renewable sources.

How many wind power plants are there in Ukraine?

Before the full-scale invasion, Ukraine had 34 wind power plants with 699 wind turbines generating electricity at an average capacity of 3.5 MW. In 2023, the most significant new power plant commissioned was DTEK's Tiligul wind power plant in the Mykolaiv region, with a generating capacity of 78 MW.

How much solar insolation is needed in Ukraine?

Solar insolation in Ukraine ranges from 1100 to 1500 kWh/m², making the entire country suitable for solar power plant deployment. The southern regions of the country are optimal for operation. Approximately half of all solar power plants are concentrated in six regions: Ivano-Frankivsk, Dnipropetrovsk, Vinnytsia, Khmelnytskyi, Kyiv, and Mykolaiv.

The first auction for state support under the Feed-in-Premium mechanism will be held through the Prozorro.Sale online system on 31 October 2024. The auction will allocate ...

The United Nations Development Programme (UNDP) has launched a tender for the provision of solar solutions in Ukraine. The deadline for applications is July 8.

New Generation Capacity Auction (700 MW) by Ukrenergo with MinEnergy is valued at about UA H 11 billion, with winners announced in April 2025 for 700 MW of solar, ...

Discover 8 groundbreaking solar and wind energy projects shaping Ukraine's future, boosting clean energy, and leading its green transformation.
