MIGO Glass is proud to announce the launch of our newly upgraded ultra-thin solar glass production line, designed to meet the growing demand for high-efficiency photovoltaic modules ...

Short Description: KS Glass successfully produced ultra-thin, ultra-light high aluminum chemical strengthened glass coated with AR coating, achieving more than 94% light transmittance. ...

Scientists at the Korea Institute of Energy Research (KIER) have developed a CIGS solar cell with ultra-thin glass (UTG), an emerging substrate known for its exceptional ...

Scientists at the Korea Institute of Energy Research (KIER) have developed a CIGS solar cell with ultra-thin glass (UTG), an ...

Ultra-thin and high-transparency photovoltaic glass is a specialized type of glass designed to generate electricity from sunlight while maintaining high levels of transparency.

Here we demonstrated an adhesive-free method of bonding ultra-thin GaAs solar cells to borosilicate glass by anodic bonding. This off-wafer processing method replaces the III ...
