Starting 1 July, the agency will begin providing subsidies to help residents cover part of the costs for home energy audits and the installation of energy-efficient equipment.

OverviewGovernment PoliciesPotentialPhotovoltaicsResearch and developmentUzbekistan is a country in Central Asia with a growing demand for electricity. Solar power can play a role in meeting this demand, as the country has abundant solar resources and a strong potential for solar energy generation. The government of Uzbekistan has implemented several initiatives to promote the use of solar power, including the development of large-scale solar power plants and the introduction of incentives for individuals and businesses to install solar panels. S...

Solar panels, water heaters and heat pumps will become mandatory in all new and reconstructed buildings. Centralized heat supply will be transferred to a closed system. In ...

Uzbekistan will allocate 2 trillion soums (EUR 148.27 million) in preferential loans to support the installation of solar panels and water heaters on homes and businesses.

Solar panels, water heaters and heat pumps will become mandatory in all new and reconstructed buildings. Centralized heat supply ...

Uzbekistan has made a positive effort toward that end, including by setting clear targets and reforming the energy sector and has been progressing toward achieving the solar power ...
