---

Systematic, months-long development of a silicon solar cell produced the functioning prototype for the first usable solar module, which ...

Therefore, some consider the true invention of solar panels to be tied to Daryl Chapin, Calvin Fuller, and Gerald Pearson's creation of the silicon photovoltaic (PV) cell at Bell ...

In the 19th century, it was observed that the sunlight striking certain materials generates detectable electric current - the photoelectric effect. This discovery laid the foundation for solar ...

Using selenium, a non-metal element known for its photoconductive properties, Fritts created the world's first solar cell. He ...

National Inventors Hall of Fame Inductee Daryl Chapin invented silicon based solar cells, the first practical device for converting ...

The inventors of the Bell Solar Battery, from left, Gerald Pearson, Daryl Chapin, and Calvin Fuller, check devices for the amount of solar electricity derived from sunlight, here simulated by a lamp.
