In planning and implementing investments in its energy sector, the Marshall Islands should be guided by the following: (i) Diversify energy and electricity fuel mix by increasing the ...

Why Energy Storage Matters for the Marshall Islands With 98% of electricity currently generated from imported diesel, the Marshall Islands faces urgent energy security and cost challenges.

Well, the Marshall Islands are living proof. With 97% of their electricity still coming from diesel generators [1], this Pacific nation spends 15-20% of its GDP on imported fuel--money that ...

Many of us want an overview of how much energy our country consumes, where it comes from, and if we're making progress on decarbonizing our energy mix. This page provides the data for ...

RMI's Renewable Energy Goal: 20% of electricity from renewable resources by 2020.5

The Marshall Islands has no electricity law or regulator and no private generators licensed to sell electricity. Its electrification rate is approaching 100% based on the number of on-grid and off ...
