How long do battery warranties last?

Battery warranties protect against defects and performance drops, typically covering 3-10 years. They often include capacity retention thresholds (e.g., 70% after 8 years) and pro-rated terms. Exclusions include physical damage, improper use, or unauthorized modifications.

Does a lithium battery storage cabinet need ventilation?

Without integrated ventilation, charging batteries within the cabinet significantly raises fire risk. Many lithium battery storage cabinets double as charging stations. If you plan to charge batteries in storage, ensure the cabinet includes: Factory-installed, grounded metal-encased electrical outlets.

What size battery cabinet does Arimon offer?

Arimon offers several standard monobloc or top terminal battery cabinet sizes for 10 kVA to 125 kVA UPS systems accommodating monobloc batteries from 100 WPC (64 batteries) to 540 WPC (40 batteries) or can work with you on even larger custom battery cabinet solutions if needed.

How long should a cabinet contain a battery fire?

According to SS-EN-1363-1 testing standards, a reliable cabinet must contain an internal fire for at least 90 minutes. Cabinets that don't meet this standard may allow a battery fire to breach containment, threatening nearby infrastructure and personnel. Proper ventilation is vital to prevent heat buildup and thermal runaway.
