Energy storage technologies and systems are regulated at the federal, state, and local levels, and must undergo rigorous safety testing to be authorized for installation in New York.

With thousands of energy storage sites already in place across the State, this exciting technology is playing an important role in making sure New York has affordable and dependable energy.

NYC Energy, LLC (NYC Energy), is developing a floating energy storage system (FESS) and associated onshore infrastructure in Brooklyn, Kings County, New York (Project).

New York State has built the nation's economic hub for the energy storage supply chain.

At MicroGrid Networks' Williamsburg site, the battery containers are elevated three feet above ground because the facility sits ...

Containerized Battery Energy Storage Systems (BESS) are essentially large batteries housed within storage containers. These systems are designed to store energy from ...
