Where can I find wind resource data?

Explore wind resource data via our online geospatial tools and downloadable maps and data sets. Access our tools to explore wind geospatial data for the contiguous United States and several international regions and countries.

Where are wind speed data stored?

Modeled wind speed developed by the National Renewable Energy Laboratory (NREL). The geospatial data are represented as points. Hourly wind speed values are stored in centroids of BOEM Aliquots in the Pacific and Atlantic Regions and BOEM Lease Blocks in the Gulf of America Region. Each download contains a geodatabase, metadata, and ArcGIS toolbox.

How does the Global Wind Atlas work?

To discover deeper insights and make better predictions we process limited personal information such as your IP. The Global Wind Atlas is a free, web-based application developed to help policymakers, planners, and investors identify high-wind areas for wind power generation virtually anywhere in the world, and then perform preliminary calculations.

The Global Wind Atlas is a free, web-based application developed to help policymakers, planners, and investors identify high-wind areas for wind ...

The Renewable Energy Program develops, maintains and uses GIS data for a wide range of activities related to planning, assessment and environmental review of renewable ...

Wireless Connectivity Adding wireless access and services to MET stations enables connectivity in remote locations. Trimark designs MET stations to operate in remote locations without hard ...
