As owner and operator of the 5-MW facility, Duke Energy will generate enough solar energy to power about 1,000 customers annually, ...

A decades-long franchise agreement is set to expire in 2026, and organizers of the grassroots "Dump Duke" campaign say now is the time for the public to consider a city ...

This is the story of the POWR (pronounced "power") token, a cryptocurrency created by an Australian-based company called Powerledger that promised an "energy ...

Energy Transfer is one of North America's largest and most diversified midstream energy companies. See how we're working to safely transport ...

The proposal, put forth by a New York company called AC Power, seeks to utilize about 25 acres of the 110-acre site for a ground-mounted array of solar panels. Repurposing ...

Reworld Hempstead is the fourth largest power generation facility on Long Island by net energy generated in 2020, behind Northport Power Station, Caithness Long Island Energy Center, and E. F. Barrett Power Station. However, it ranks thirteenth on Long Island by nameplate capacity. It consists of a single waste-to-energy unit. It is operated by Reworld, and the electricity generated at the plant is distributed across Long Island via the Long Island Power Authority's electrical transmission network
