Which solar energy options are available in Sudan?

In Sudan, three solar energy options are available: 1. Solar PV energy: 1000 MW (on- and off-grid) will be applicable in different states within Sudan. 2. Solar CSP technology: 100 MW (grid connected) will be applicable, especially in the northern part of Sudan. 3. Waste to Energy: 80 MW (grid connected) will be applicable in several intended sites.

Can South Sudan generate solar power?

South Sudan's rural electrification plans include large-scale solar thermal and small-scale solar photovoltaic power generation given its access to an average of more than 10 hours of sunshine per day year round, with radiation on the horizontal surface of about 5 - 6 kWh/m<sup>2</sup>/day.

How many solar water systems are delivered in Abu Hamad?

Empower & UNDP deliver 84 solar water systems in Abu Hamad, a major irrigation project in Sudan with LONGi solar panels, Jntech inverters, Italian Pentax pumps, and sturdy i-section beams. Empower Co, LTD. had the pleasure of participating in and sponsoring the Technozare Expo 2 exhibition at University of Medical Sciences & Technology (UMST).

What can Solar do for Sudanese communities?

We design, install and maintain solar systems that empower Sudanese communities and businesses. Reliable off-grid systems for hospitals and clinics; powering critical equipment, lighting and vaccine fridges. Solar water pumping and irrigation for farms; solar cooling for storage; reliable power for agro-processing.
